## Professional Summary

Junior Backend Developer with great knowledge of Python and Django. Experienced in building REST APIs, automating tasks via Telegram bots, and managing relational databases. Proficient in Linux environments and deploying applications using Docker and Nginx.

## Projects & Deployment

### Backend & API Development

Personal Projects | Python, Django, DRF, PostgreSQL

- Built and optimized clean RESTful APIs using Django Rest Framework for web platforms.
- Designed structured relational database schemas using PostgreSQL, MySQL, and MariaDB.
- Integrated secure authentication systems and managed data flow between frontend and backend layers.

### Deployment & Automation

Infrastructure & Bots | Docker, Nginx, Railway, DigitalOcean

- Developed functional automation tools and custom interactive bots using Aiogram and Telethon frameworks.
- Deployed scalable services across modern cloud infrastructures including Railway and DigitalOcean platforms.

## Education & Training

### Bachelor in Marketing *2024 - Present*

Tashkent State University of Economics (TSUE) | Tashkent

### Backend (Python / Django) - *Graduated*

Najot Ta'lim IT Academy | Tashkent
